

Irene Maldini is a researcher at OsloMet University in Norway. Irene conducts critical research on the environmental impact of growing consumption and production volumes of clothing and other consumer goods. She specializes on the solutions that have been proposed to reduce these volumes at company and public policy levels and in assessing their effect. Having worked as a product designer and an academic in Uruguay, Brazil, and the Netherlands, she lives now in Portugal and works for Oslo Metropolitan

University in Norway. In 2020, Irene Maldini's PhD won the Research of the Year Award at the Amsterdam University of Applied Sciences.
